

```
1
2 import socket
3
4 # Create socket
5 client_socket = socket.socket(socket.AF_INET, socket.SOCK_STREAM)
6
7 # Connect to server
8 host = '127.0.0.1'
9 port = 12345
10 client_socket.connect((host, port))
11
12 # Send message to server
13 message = "Hello Server!"
14 client_socket.send(message.encode())
15
16 # Receive response from server
17 data = client_socket.recv(1024).decode()
18 print("Server says:", data)
19
20 # Close socket
21 client_socket.close()
```
