

```
1
2 import socket
3
4 # Create socket
5 server_socket = socket.socket(socket.AF_INET, socket.SOCK_STREAM)
6
7 # Bind socket to IP and port
8 host = '127.0.0.1'
9 port = 12345
10 server_socket.bind((host, port))
11
12 # Listen for connections
13 server_socket.listen(1)
14 print("Server is waiting for connection...")
15
16 # Accept client connection
17 conn, addr = server_socket.accept()
18 print("Connected to:", addr)
19
20 # Receive data from client
21 data = conn.recv(1024).decode()
22 print("Client says:", data)
23
24 # Send response to client
25 message = "Hello Client, message received!"
26 conn.send(message.encode())
27
28 # Close connection
29 conn.close()
30 server_socket.close()
```
